

PARADISE WAVE

crypto. hub. maldives.

whitepaper.

our story.

Paradise Wave is a real-world asset crypto startup based in the Maldives aiming to making waves within the crypto space.

Striving to become a prominent player in the international tourism industry and within the crypto space, Paradise Wave is primed to be on top the list of RWA and tourism projects within the space leading the narrative.

Paradise Wave was initially found in February 2022 as “Brise Paradise” under Bitgert startup studio projects on the Bitgert chain, later rebranded to Paradise Wave during April 2024 in a move to become an independent and more accessible entity on other major chains such as Ethereum and Binance, Solana etc.

Aimed to become a prominent crypto hub in the coming years, we have planned to build a Hotel and develop a Private Decentra Island in Maldives while developing our own AI platform for all travelers around the world. The Mobile app will deliver tailored plans and solutions for your travel needs and help you save during your trip planning by eliminating certain fees you may encounter such as hiring travel agents.

Our AI solution-based app will cover everything you’ll need.

Buy tax 3% which will directly be sent to our burn address hence making the token a self-deflationary token.

Sell tax 3% will be used for the project's development.

the hotel.

The hotel is being constructed at a local inhabitant island called “Faresmaathoda” of the Maldives where a domestic airport is in operation, so our guests can take a domestic flight of 50 minutes to the island from the Velana International Airport.

Mixing traditional Maldivian décor and modern furnishings, all 18 airconditioned rooms enjoy views of the beach, garden and the peaceful outdoors of a local inhabited island in Maldives. All rooms will be equipped with a flat-screen TV, private bathrooms, slippers, dental kit and much more.

Perfect destination for budget travelers while we will also have a VIP suite for those who are looking to book a large and spacious rooms with private jacuzzi and lounge area.

The island Faresmaathoda is located in an amazing location geographically with lots of uninhabited islands and scuba diving or snorkeling points preserved well over the years. While also great surfing breaks just nearby the island perfect for surfers!

retreat.

To lease this 42 000 sqft island within the lagoons of “Faresmaat-hoda” (the island where hotel is being built) to act as an extension of our hotel where rooms/villas, or a pool and a restaurant and potentially a bar will be built.

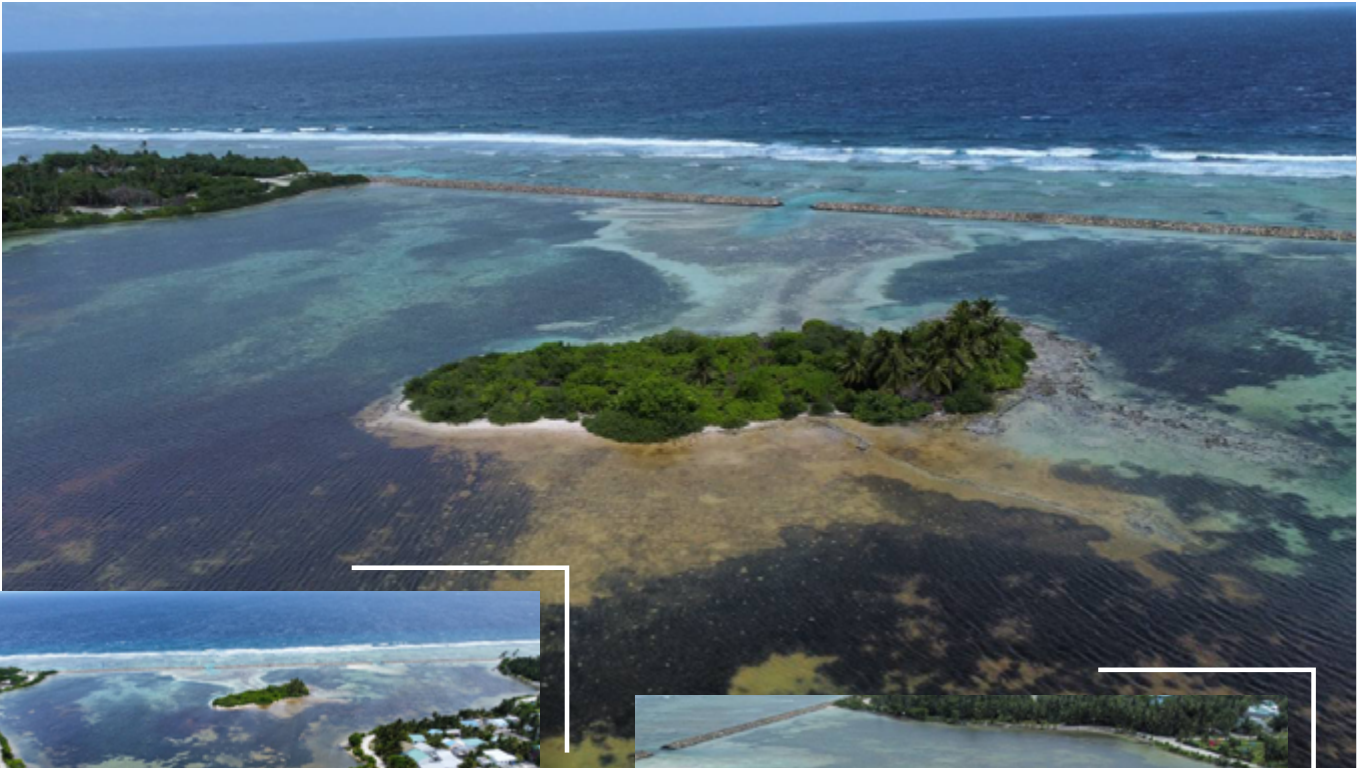

Our company has already won the bid to lease the island. The island will be connected to the hotel Island via bridge with a distance of five-minute walk from the hotel.

The island will feature pop up stores for merchandise and souvenirs, restaurant with local and foreign cuisines, spa wellness, pool, Jacuzzi, sunbed for tanning and relaxation while enjoying the forest ambiance.

private decentral
island.

We plan to acquire a 5 – 10 hectars private island in Maldives together with our venture capitalists and investors.

Investors can send us their letter of interest to invest with us via email to investors@paradisewave.org. The forecasted annual revenue from the envisioned private island resort is USD 10,000,000 per year.

Apart from being a standard private island resort, we will also establish mining stations for \$Bitcoin mining at the island which would be powered by the sea current, thus making it even more sustainable and allow people to rent rigs from the station which would be adding addition revenue stream to our investors.

Furthermore, the private island will host annual events such as hackathons with grants for enthusiast developers within the ecosystem to help build future products and solution to help pave the bridge between DeFi and real world while also hosting various festival event for all likeminded people in this space to join and have fun.
